EARBONE MICROPHONE

These industrial use Earbone microphones allow you to hear **and talk** via vibrations through your ear canal. Designed for high noise environments, they are ideal for use with earmuffs or breathing apparatus. The integrated earpiece/microphone design allows discreet, high intelligibility communications for mission critical applications.

Designed to provide a lone worker with a "guardian angel" should they fall, suffer a medical mishap or be attacked; our Lone Alert™ accessories help provide a safer and more secure working environment.

NOT QUITE WHAT YOU WERE LOOKING FOR?

We also have an exhaustive range of **Special Order** accessory solutions. These include covert accessories, throat microphones, temple transducers, in fact, if it connects to a two way radio, we can probably meet your needs no matter what the specific application.

best OH&S solution

ITRQ™

EAR MICROPHONE

Patented *twist & lock*™ connectivity
Super enhanced cords
Whisper clear audio

Use with
"TL" series
earpieces
below

"...just add your personal choice of earpiece"

Wireless Pacific's totally new iTRQ features super enhanced cords allowing you to leave the **whisper clear** microphone harness attached to the radio and to simply swap earpieces when users change shifts. The patented **twist and lock** 2.5mm earpiece connection eliminates wear on the radio, hence reducing radio repairs. Personal issue of earpieces is good for hygiene and increased accountability. Save money! Buy one "iTRQ" per radio then choose from a huge variety of inexpensive comfortable earpieces for every staff member.
